### WORK EXPERIENCE:

#### Senior Front End Developer

Thimble | November 2020 - July 2022

- Development of web projects from initial design through completion, including optimization, QA, and cross-browser functionality.
- Working closely with various teams (product, marketing, design), to ensure design and development correlates with company mission.
- Development and integration of custom themes into Wordpress, including creating site architecture and optimizing ACF.
- Using the ACF plugin to create a backend system for the copywriting and marketing team to create, edit, and publish pages at a faster rate.
- Led a team of developers (web and backend) to asses designs and ultimately lead them to success in their goals as well leverage project management tools

**Skillset: HTML/CSS/SASS, JS/jQuery, PHP, Wordpress**

#### Front End Developer

SecondChild | September 2019 - September 2020

- Maintenance and monitoring of various sites during deployment, staging, and production
- Completing end-to-end project sprints which include both front end and back end development
- Troubleshooting oncoming bugs and meeting client expectations

**Skillset: React.js, GraphQL, Javascript, jQuery, PHP, Gatsby.js**

#### Front End Developer

Lucid | October 2018 - August 2019

- Shopify development for various sites, including theme development, custom modules, troubleshooting, and configuring existing Shopify stores and creating new ones
- Front end development on over a dozen e-commerce clients such as United by Blue, Dagsmejan, Cuup, Dollar Clean Club, etc
- Completing end-to-end project life-cycle from spec requirement gathering to client hand-off
- Emphasizing rich user experience through UI development

**Skillset: Liquid, Ruby, Javascript, jQuery, UI/UX design, E-commerce**

#### Web Developer

SBLM Architects | January 2017 - July 2018

- Developing and designing new user-interface features, and ensuring the technical feasibility for UI/UX designs by using Sketch and Photoshop
- Communicating directly with clients to establish project parameters, writing proposals for design work, analyzing competitor web sites, producing site maps and mockups for client approval, and detailing progress
- Extensive research done on company, projects, and architecture to create a reflection of company values and principles

**Skillset: HTML/CSS, Javascript, jQuery, UI/UX design**
